

jQuery Dropdown

jQuery Dropdown is a flexible, cross-device replacement for form selects and multi-level menus. Features include automatic resizing, collision detection and keyboard navigation.

Requirements

JAVASCRIPT

jQuery Dropdown requires [jQuery](#) v1.10.0+ and [jQuery Transit](#) v0.9+ (included).

BROWSER SUPPORT

All major modern browsers are supported, including IE7+.

For older browsers which do not support CSS transitions, the dropdown will still work but will not be animated.

Usage

HTML

Include the required files;

```
<link rel="stylesheet" type="text/css"
href="./css/dropdown.min.css" />
```

```
<script
src="//ajax.googleapis.com/ajax/libs/jquery/1.11.1/jquery
.min.js"></script>
<script src="./js/jquery.dropdown.min.js"></script>
```

Add some markup;

```
<select>
    <option>Option 1</option>
    <option>Option 2</option>
    <option>Option 3</option>
</select>
```

```
<ul>
```

```
<li>Item 1</li>
<li>Item 2</li>
<li>Item 3</li>
</ul>
```

JAVASCRIPT

Initialise with jQuery;

```
$(function() {

    $('select, ul').dropdown();

});
```

Options

INITIALISING

Options can be set with JavaScript;

```
$('#select').dropdown({
    multiple: true,
    toggleText: 'Select items'
});
```

Or via the `dropdown` data attribute;

```
<select multiple data-dropdown='{ "multiple": true,
"toggleText": "Select items" }'>
    <option>Option 1</option>
    <option>Option 2</option>
    <option>Option 3</option>
</select>
```

OPTION	DEFAULT	DESCRIPTION
animation	true	Whether or not to animate the dropdown
speed	300	Animation duration in ms
autoClose	true	Close the dropdown when it

autoClose	<code>false</code>	Loses focus
autoResize	<code>300</code>	The number of ms to wait before resizing after the available space changes
autoToggle	<code>true</code>	Update the toggle button when an item is selected
autoTitle	<code>true</code>	Set the menu title based on its parent value
nested	<code>true</code>	Nest groups into multiple levels
multiple	<code>false</code>	Allow multiple item selections
keyboard	<code>true</code>	Allow keyboard navigation
margin	<code>20</code>	The amount of space, in pixels, around the dropdown menu
toggleText	<code>'Please select'</code>	Default toggle button text
titleText	<code>'Please select'</code>	Default menu title

backText	'Back'	Back button text and title
closeText	'Close'	Close button text and title
classes	{}	Additional classes to apply to the dropdown elements
templates	{}	HTML templates to use for the dropdown elements
toggleElem	{}	Options for using a custom toggle element
selectParents	false	Allow selection of parent items

CLASSES

The following are all of the class names used by the plugin;

```
{  
  
  dropdown: 'dropdown',  

```

```
overlay:          'dropdown-overlay',

// Menu
mainMenu:         'dropdown-main-menu',
menuObject:       'dropdown-menu',
menuWrapper:      'dropdown-menu-wrapper',
menuContainer:    'dropdown-menu-container',
menuHeader:       'dropdown-header',
menuTitle:        'dropdown-title',
menuLabel:        'dropdown-label',
menuDivider:      'dropdown-divider',
menuMask:         'dropdown-mask',
menuParent:       'dropdown-parent',
menuChild:        'dropdown-child',
menuList:         'dropdown-list',
menuItem:         'dropdown-item',

menuLink:         'dropdown-link',
menuText:         'dropdown-text',
menuAbove:        'dropdown-above',

// Back
backButton:       'dropdown-back',
backText:         'dropdown-text',
backIcon:         'dropdown-icon',

// Toggle
toggleButton:     'dropdown-toggle',
toggleText:       'dropdown-text',
toggleIcon:       'dropdown-icon',
```

```
// Close
closeButton:    'dropdown-close',
closeText:      'dropdown-text',
closeIcon:      'dropdown-icon',

// Icons
iconPrev:       'dropdown-icon',
iconNext:       'dropdown-icon',

// States
above:          'dropdown-above',
below:          'dropdown-below',

open:           'dropdown-open',
menuOpen:       'dropdown-menu-open',
closed:         'dropdown-closed',
disabled:       'dropdown-disabled',

opening:        'dropdown-opening',
closing:        'dropdown-closing',
animating:      'dropdown-animating',
resize:         'dropdown-resizing',
loading:        'dropdown-loading',
menuOpening:    'dropdown-menu-opening',
menuClosing:    'dropdown-menu-closing',

selected:       'dropdown-selected',
selectedParent: 'dropdown-parent-selected',
```

```
focused:          'dropdown-focus'

pageOpen:         'dropdown-is-open',
pageOpenBefore:   'dropdown-before-open',
pageOpening:      'dropdown-is-opening',
pageClosing:      'dropdown-is-closing'

}
```

TEMPLATES

The following are all of the HTML templates used by the plugin;

```
{

    dropdown:      '<div />',
    overlay:       '<div />',

    // Menu
    menuObject:    '<div />',
    menuWrapper:   '<div />',
    menuContainer: '<nav />',
    menuHeader:    '<header />',
    menuTitle:     '<div />',
    menuMask:      '<div />',
    menuList:      '<ul role="menu" />',
```

```
menuItem:      '<li role="presentation" />',
menuLabel:     '<li role="presentation" />',
menuDivider:   '<li role="presentation" />',
menuLink:      '<a href="#" role="menuitem" />',
menuText:      '<span />',
```

```
// Toggle
```

```
toggleButton:  '<a href="#" />',
toggleText:    '<span />',
toggleIcon:    '<span />',
```

```
// Back
```

```
backButton:    '<a href="#" title="Back" />',
backText:      '<span />',
backIcon:      '<span />',
```

```
// Close
```

```
closeButton:   '<a href="#" title="Close" />',
closeText:     '<span />',
closeIcon:     '<span />',
```

```
// Icons
```

```
iconPrev:      '<span />',
iconNext:      '<span />'
```

```
}
```
